## INVITATION

Dear all,

Following the successful Vertical Flight Efficiency Expert Workshops in 2020 and 2021, FABEC has the pleasure to invite you to next VFE WS.

### FABEC VFE (Vertical Flight Efficiency) Expert Workshop

**Wednesday 7 December 2022**

**10:00 – 16:00**

**Nice Airport, France**

**Business center in Terminal 1**

We are looking forward to gathering all involved experts of the aviation industry on the topic and are happy that this time the workshop will be held **in a face-to-face mode only**. We are convinced that the exchanges and discussions will be even more lively and inspiring for all participants. Therefore, we reserved an easily accessible location in the Business center of Terminal 1 at Nice Airport, France.

Environmental impacts are still high on the agenda. We need to continue working together on improving flight efficiency. The in-person workshop will be an opportunity to exchange our views and align our performance with concrete sustainable operations. It is important to involve airline operators in all our projects to co-create the best solutions for the benefit of the entire industry.

If you still have suggestions for the agenda or questions regarding practical arrangements, feel free to contact Nadine Meesen, CRM contact for FABEC ([nadine.meesen@fabec.eu](mailto:nadine.meesen@fabec.eu) or +32 475 9999 48).

You can still register via [fabec.eu](https://www.fabec.eu):
